

SCIENCE EXPLORATIONS

Animals, Adaptation, and the Galápagos Islands
Discover with Darwin

Level 2: Investigation

Take a look at the similarities and differences among the many kinds of birds in the Galápagos.

Coloring

Look at the feathers of the following birds. How would their coloring help or hurt them in the Galápagos environment?

Bird Beaks

Look at the shape of the bird beaks. How are they the same or different? What kinds of foods do you think each bird eats?

Size

Look at the size of these birds. What can you guess about the areas in which they live?

Patterns

What kind of patterns do you see among birds in the Galápagos?
