

A Place Where Kids Find Their Spark

SparkTop.org™ can help your 10- to 12-year-old students who have learning difficulties, including learning disabilities (LD) and Attention Deficit/Hyperactivity Disorder (AD/HD), feel better about themselves. By giving students information about how they learn, SparkTop.org helps them recognize their unique strengths, showcase their creativity, and safely connect with other kids. As an educator, you know how crucial self-esteem is to a child's success in school and at home.

SparkTop.org utilizes a coordinated approach to address the needs of kids with learning difficulties by providing the following:

1 **Understanding and Information:**

SparkTop.org provides research-based information that kids can readily put into practice.

- *Studio 24/7* provides answers to kids' questions about school, life, LD, and more.
- *DBTV* offers specific tips to help students maximize their strengths while managing their learning challenges.
- *BrainPOP on SparkTop®* movies provide accurate information on dyslexia, the brain, AD/HD, and more.

2 **Support:**

Kids who struggle with learning can perceive themselves as less smart than their peers and siblings.

- On SparkTop.org's monitored *Message Boards*, kids organically form supportive communities—discussing problems and sharing what they enjoy.
- *Spark 2 Spark* lets kids safely connect with one another.
- *Fame Brains* introduces kids to famous people who struggled in school, yet used their unique talents to do incredible things.

3 **Success:**

Like all kids, those with learning difficulties want to be acknowledged when they do well. SparkTop.org encourages kids to share their strengths and successes with each other.

- In *The Last Bell*, kids celebrate their hobbies and talents.
- The *Create Tools* allow kids to paint an idea, record a question, create a music mix, type a poem, or draw a story.
- In the *BrainScan Gallery*, kids get to show off their creations.

4 **Fun:**

SparkTop.org also offers informative and challenging games so that kids can take a break and have fun!

- *BrainSpin* lets kids create a wacky, unique brain that reflects their personal strengths, then use it for bonus points in the *HeadZipper Game*.
- In *2 Cubed*, kids compete in a real-time multi-player trivia game.
- *HeadZipper* and *SparkTop Pop* reinforce that no two brains spark alike!

SparkTop.org encourages kids to celebrate their unique strengths and talents, embrace their differences, and harness the tools that can help them succeed in learning and life.

SPARKTOP.ORG™
WHERE NO TWO BRAINS SPARK ALIKE!
