

WordZones™ for 4,000 Simple Word Families

Dr. Elfrieda Hiebert, August 2014

The 5,586 most frequent words have been sorted into WordZones™ for 4000 Simple Word Families.

These 5,586 words are grouped into four WordZones™

1=310:Most Frequent

2=311-930 MF

3=931-2606 MF

4=2607-5586 MF

The 5586 words become 3913 words (rounded up to 4,000 simple word families) when simple inflected endings are clustered with root word.

When the 4,000 words in simple word families are placed into complex word families, the list of words is reduced to 2,500 words. Complex word families includes the simple word family members, plus their derivational family members.
