Jupiter is the fifth planet from the Sun.

It is the largest planet in the **solar system**.

All the planets rolled together could fit inside of Jupiter.

You could fit 1,400 Earths inside Jupiter.

A diagram of the solar system. The Sun is at the bottom, glowing orange and yellow. The planets are shown in a line above it, with their orbits indicated by white lines. Jupiter is the largest planet, and Earth is the smallest. Arrows point to Jupiter and Earth. The background is a dark space with stars.

Introduce young readers to a wide range of real world subjects with vivid color photography.
