

Name _____

SOLAR SCAVENGER STROLL

Directions: Take this page and a pencil outdoors with you on a sunny day. Write your discoveries on the blank lines.

1. Find and name two things that need sunlight to live.

2. What do you think the temperature is? (Check later to see how close you were!)

3. Find and describe a surface that reflects sunlight.

4. Find and describe something that collects the sun's heat.

5. Find and describe something that stays cool even though it is sunny out.

6. Find and name two things that cast shadows from the sun.
