

Workshop 2: Tsunami: Disaster of the Century**Reading 1 Project: Waves of Destruction**
Tsunami Flowchart

Help others understand the 2004 tsunami by breaking it down into steps.

Project: Work with a partner to create a flowchart that shows how the tsunami developed.

Procedure**1. Identify key events.**

List important events. Review page 34 of your *rBook Flex* to help answer these questions:

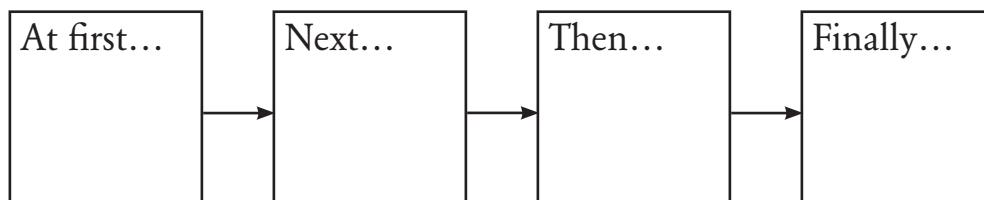

- What event started the tsunami?
- What happened next?
- Where did the tsunami reach?
- What was the final stage of the tsunami?

2. Write a draft.

Write a sentence for each stage of the tsunami's development. Remember to use signal words such as *first*, *next*, or *later* to show the order of events. Find or make an illustration for each stage.

3. Make the flowchart.

Use as many boxes as you need. Here's an example:

Add your illustrations to each stage. Can you think of interesting shapes to use instead of boxes?

4. Present your work.

Add a title. Then post your flowchart and share it with others.
