

**Workshop 7: Alien Invaders****Extended Project****Invader Species Index**

*Invader species cause big trouble! But many people don't know much about them.*

**Project:** List at least five invader species.  
Present two or three facts about each.

**Procedure****1. Research types of invader species.**

You may use examples from Workshop 7 and find others.

- Try these search terms on an Internet browser: “invader species” and “non-native species.”
- Use reference books in the library.

**2. Take notes.**

Scan the headings of the texts you found. Look for the two or three most important ideas about invader species.

- Where does the species come from?
- Where did it move to?
- How is it affecting the new environment?

List the information on note cards. Be sure to write down where you got your information.

**3. Write a draft.**

List the species in alphabetical order. Write at least three sentences for each entry.

**4. Present your work.**

Type your work on the computer.

- Use boldface and other formats to make it easy to read and understand.
- Add illustrations or photos.
- Show it to a friend. Does he or she have any suggestions?
- Be sure to include a bibliography.
