

Workshop 7: Alien Invaders**Quick Project****Invader Species Warning Poster**

Invader species cause big trouble! But many people don't know much about them.

Project: Make a warning poster to let people know about invader species.

Procedure**1. Brainstorm key points.**

What do people need to know about invader species? List two or more ideas about each question below.

- What is an invader species?
- Why do invader species cause problems?
- What are some examples of invader species?

You don't need to use all of your ideas. You probably won't have room! So choose three or four of your favorite facts.

2. Plan your layout.

How will your poster look? What will the headline say? Where will you list the facts you've chosen? Sketch out some ideas. It may take several tries.

3. Locate or create images.

Will you draw illustrations? Will you find photos on the Internet or in magazines?

4. Present your work.

Put it all together on a piece of poster board. Use markers, your best handwriting, and your pictures to grab people's attention. Invite others to take a look and ask you questions.
