

Workshop 7: Alien Invaders**Reading 1 Project: Freaky Fish Invasion**
Freaky Fish Flowchart*Snakehead fish, go home!*

Project: Work with a partner. Create a flowchart. Show key events about the snakehead fish invasion in Maryland.

Procedure**1. Identify key events.**

List important events. Think about these questions:

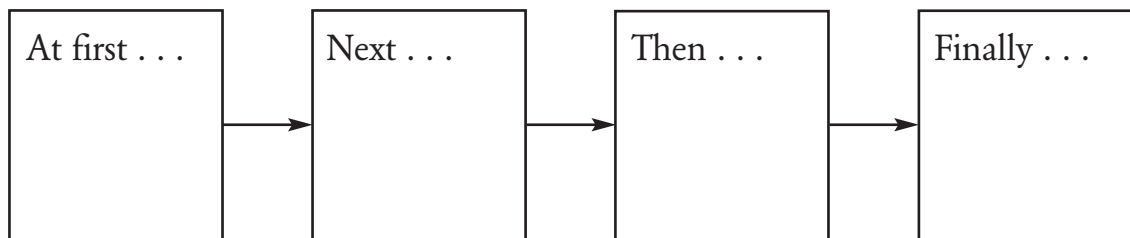

- What was the pond in Maryland like at first?
- What changed at the pond?
- What happened next?
- How was the problem solved?

2. Draft.

Write one or two sentences for each of the key events. Then put the sentences in sequence order.

3. Make the flowchart.

Write your sentences in different boxes of a flowchart. Here's an example:

Use as many boxes as you need. Can you think of interesting shapes to use rather than boxes?

4. Present your work.

Add a catchy title. Can you draw or find pictures to add? Then post your flowchart and share it with others.
