

Workshop 1: Fires Out of Control**Reading 2 Project: Smoke Jumpers**
Selling Safety

Smoke jumpers have a really dangerous job! How do they stay safe?

Project: List three things a smoke jumper needs to do the job safely. Give a brief explanation of how each thing is used.

Procedure**1. Gather facts.**

Reread “Smoke Jumpers” on pages 13–14 of your *rBook*. Make notes about these questions:

- What special clothing or equipment helps the smoke jumper at each stage of the job?
- How is each thing used?

2. Write.

List three things you will write about. Include a drawing of each one, if you want. Under each item, write one or two complete sentences explaining how it is used. Remember to tell how it keeps the smoke jumper safe.

3. Present your work.

Imagine you are a salesperson. Your company makes these safety items. Your classmates are all smoke jumpers. Use your written information to tell them why they should buy your products. Invent a company name. Make up prices for each item. Take their orders. Get into the role and be creative!
