# The Support You Need for the Common Core

The Common Core State Standards (CCSS) represent a sea-change in education. The CCSS are a call for action, setting high expectations for all students, demanding excellence in teaching and top-notch curriculum materials to attain those goals. Scholastic has developed materials geared to helping your school or district meet these rigorous standards. Through proven literacy programs, a wide range of authentic text, customized collections, and a variety of professional development resources, Scholastic is well-positioned to help you implement the CCSS successfully for all learners.

## Common Sense About the Common Core

You've no doubt heard a lot about the Common Core, but you may be struggling to interpret what they mean for you in practical terms. Here are five of the basic shifts that standards call for.\*

1. Students need to develop the comprehension skills to read and understand **increasingly complex texts** on a broad range of topics.
2. Students need to **answer text-dependent questions** and cite evidence when offering interpretation.
3. In addition to a rich reading of literature, the standards require **extensive reading of nonfiction genres and topics**.
4. Students are required to **learn critical content** and gain a foundation in classical literature and fundamental historical documents.
5. The standards emphasize **analytical, evidence-based writing and research with a purpose**.
6. Students need to **build academic and domain-specific vocabulary** to access content across the curriculum.

The Common Core emphasizes the gap between students' current skills and what students need to achieve to be ready for college and careers. Scholastic middle school programs support teachers, students, and families by making these rigorous standards more accessible through comprehensive alignments, materials, and instruction to ensure student achievement in the Common Core classroom and beyond.

# Comprehension Clubs

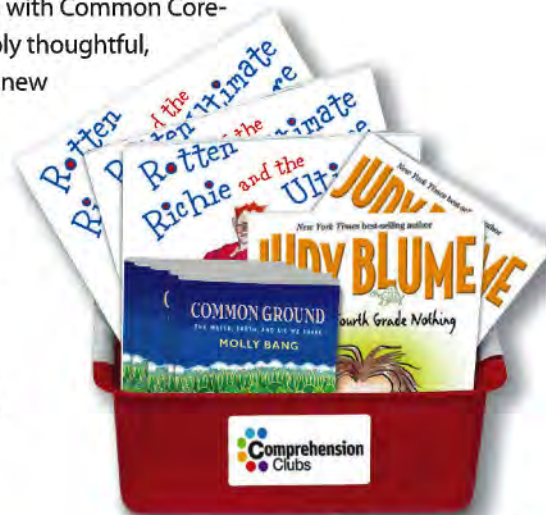

**Bringing deep reading, deep thinking, and deep discussion to the whole class.**

**Comprehension Clubs** helps students engage with high-quality literature and informational texts that build knowledge, enlarge experience, and deepen comprehension. A collection of more than fifty books organized around six thematic strands with Common Core-aligned lesson cards draw students into deeply thoughtful, dynamic conversations about authors, ideas, new understandings, essential words, and the exquisite language of books. Every day, you and your students read—in a whole group Interactive Read Aloud and in small group Student Book Clubs—and talk, think, and write about books.

Why **Comprehension Clubs**? Because each unit of study helps you address the five key expectations of the Common Core State Standards for English/Language Arts instruction. Students must:

- Develop the strategic actions needed to support high-level quality comprehension
- Build proficiency as independent readers
- Learn to process fiction and informational text across a broad range of text types
- Learn critical content across science and social studies
- Use reading and writing as mutually supportive, integrated language processes

**Comprehension Clubs**  
**Common Ground**  
**Summary**  
 Ever long ago, people ran into problems when they did not conserve the resources they had. This book begins with a parable about too many sheep grazing on the village commons and then moves on to discuss how we use water and other natural resources today. The author reminds readers that Earth, like that village commons, has only so much room and so many resources.

**Author:** Molly Bang  
**Format:** Picture Book  
**Outcomes:** Interdependence of life on Earth; responsibility; fairness and sharing; conservation  
**Text Features:** Why is water so important to all living things? authors' choice of repetition and parallel selection and presentation of factual information  
**About the Author:** What is the best way to share natural resources today and preserve them for the future? It's a question that Molly Bang, well-known author and illustrator of picture books including *Caldwell's Paper Boat*, *When Sophie Gets Angry—Really, Really Angry*, *Wishy Wash*, *Sharkies*, and *Water*, asks. As an author for science and she writes common ground to help children understand scientific principles that affect their daily lives.

**Key Understandings:**  
 The parable introduces the real consequences of overuse of shared natural resources in a narrative way.  
 As she presents facts, Bang uses the refrain "In the short run" to distinguish between short-term and long-term consequences.  
 Bang believes people must work together NOW to solve the problem of overuse of natural resources because the problem has reached a global state.

**Suggested Stopping Points to Invite Thinking**  
 You may wish to pause to ask students to narrate and talk with partners or share whole-group conversations as noted below.  
**Introduce the Book:** What can a story about sheep eating grass tell us about the way people use environmental about today? Being smart or understanding about a contemporary problem?

Stopping Point	Prompt	Possible Response
p. 15 Thinking Within and Beyond the Text	What is happening on the commons and why is it a problem? Do the students see being the global problem addressed in this parable?	Students may point that fewer sheep and pasture means
p. 21 Thinking Within and Beyond the Text	How does Bang compare the village's story to things happening on Earth today? How is the ocean like the village commons?	She says that we use water the way the sheep use their commons; fish get used up or get sick.
p. 26 Thinking Ahead and Beyond the Text	How does Bang use further to share information? Why do you think she organized the book this way?	She shows how our resources seem to be at first, but later be problems. She wants to think about how actions affect every
p. 36 Thinking Beyond the Text	Do you agree or disagree with Bang's main point? Why do you think she began and ended the book the way she did?	Students may see a message of Earth as a reminder that each problem may have none

**Summarize:** We all need resources to live, but some are limited. Who gets them?

**Common Ground**  
**Teaching Option: Things to Notice and Do**

**Notable Text Features**  
**Supportive:** The author's message seems to be written as if she is speaking directly to her readers, urging them to consider the problem the story tells her.  
**Challenging:** Some students may need help in understanding what a parable is, why people sometimes use such stories to make an important point.  
**Vocabulary:**  
**Essential Words:** commons, p. 29; fish such as cod and sea bream from the remains of plants or animals from long ago resources, p. 35; to give support  
**Related Words for Discussion:** conservation; protection of natural resources; parable; a simple story that tells a moral truth; responsibility; something for which one is in charge

**Connect to Book Club Books**  
**What is the "common ground" explored in each of these books? Encourage students to link their reading to a range of settings, e.g.,**  
*Water's Tale*, by showing what they learned from working with our dolphins, scientists helped many people with artificial limbs.  
*Into the A-B Sea*, How people use water affects the sea animals highlighted in the book.  
*The Fishy Field Trip: The Great Barrier Reef is a community, too*  
**Corollary Reads:** Both authors use their own set of all details that support what they want to say about the sea.

**Write and Respond**  
 Encourage students to reflect on the writing they've done in their notebooks. Have them work in small groups to create "Conservation Now" posters. Each poster should focus on one natural resource. Students should:  
 • Illustrate the natural resource.  
 • Illustrate the effects of short-term overuse of the natural resource supported by factual evidence.  
 • Write a short paragraph that uses the facts to persuade the reader and explain how to conserve the natural resource.

**Supporting ELA**  
 If students note the meaning of the phrase *commons* given the meaning of the entire story will be lost to them. Point out to students the definition of the village on the commons-based form on page 12. Connect that with the calm and happy village on pages 14-15. Focus on the concept of responsibility; help students understand the meaning of the repeated phrase "In the short run."

**Additional Resources:**  
 Encourage students to find out about conservation methods shown in the book such as solar panels, wind turbines, miniature collection and recycling.

#### During Reading

**Develop Reading Strategies**

Throughout the guided reading of this book, monitor the reading behaviors of individual students. Challenge students to think about their own reading behaviors and the strategies they use when they encounter difficulties. Use opportunities to help students employ a combination of semantic, syntactic, and graphophonic cues to anticipate text and check predictions. Encourage them to reread text to confirm and to gain further information.

#### Guided Reading Notes

# ID voice:vision:identity

## Reconnect adolescents to reading through writing!

**ID voice:vision:identity** is a high school literacy program for all students—especially those who may have simply stopped reading, stopped writing, and tragically stopped engaging with text. **ID** provides educators with the tools they need to encourage disengaged teens to get involved in the literary community.

**ID**'s sixteen writing workshops are based on four social justice platforms that:

- provide literary resources to counter larger out-of-school forces
- build personal textual lineages
- help students define who they are and connect them to goals larger than themselves
- inspire students to explore their world and write, getting their “voices on record”

As program author and advisor, Dr. Alfred W. Tatum states **ID voice:vision:identity** is a call to action that gets his students—and all students—“writing for their lives.”

### **ID** features four key learning platforms that serve as roadmaps for *thinking, doing, and acting*.

- **DEFINE SELF:** Finding the text and language that helps students put their voice on record without waiting for others to define a generation
- **BECOME RESILIENT:** Remaining steadfast in the face of vulnerability-producing conditions inside and outside of school
- **ENGAGE OTHERS:** Bringing other contemporaries into the fold to strive toward a better humanity for all
- **BUILD CAPACITY:** Creating a foundation for future generations and agenda-building

A simple resource with a profound promise, **ID** is based on the success of Dr. Alfred Tatum’s work and research with adolescent students. Dr. Alfred W. Tatum is an associate professor at the University of Illinois at Chicago and Director of the UIC Reading Clinic where he hosts an annual African American Adolescent Summer Literacy Institute.

Scholastic has created a new line of Summer Reading Take-Home Packs designed to keep kids reading all summer and avoid the summer reading slide.

- Include a math title in every nonfiction K–5 pack
- Feature a FREE title-specific activity sheet for each book
- Include award-winning, best-selling kid-favorite titles
