

Literacy Support for Your **Summer** and **Learning** **Recovery Plans**

After a challenging and unconventional school year, Scholastic recognizes that the next several months—and beyond—will be a critical time for accelerating learning and addressing trauma. Students will need resources that support social-emotional development, allow for instruction and the practice of foundational skills, accelerate learning, prepare our youngest learners to succeed in kindergarten, and so much more.

For 100 years it has been our mission to help all students succeed while supporting educators and families in their important work to nurture a love of reading and learning. We welcome the opportunity to partner with you to create a unique summer learning plan that provides continuous instruction and engagement for your students, teachers, and families.

Help All Students Succeed

As you think about your summer plans, consider how your program will provide support for:

Customize a Solution for Your Students

As you strive to offer meaningful learning opportunities for your students in school, at home, or via a hybrid model, we are here to help. Here are some questions to consider as you develop your summer learning plan.

- 1 What are the priorities of your summer program? What do you hope to celebrate next fall when you reflect on your plan to support learning during this critical summer semester/fifth quarter?
- 2 How will your summer plans address the needs of all students and those who need additional support?
- 3 Are you planning for your program to be in school, at home, or hybrid?
- 4 Will instruction be led by teachers, or by families, or self-directed by students, or a combination of these?
- 5 Will you deliver instruction via print or digital materials, or a combination of these?
- 6 How will you ensure that instruction takes place, regardless of changes to learning environments?
- 7 How will you ensure that summer learning progress will weave seamlessly into the 2021–2022 school year?
- 8 What data do you need from your summer program to inform and drive instruction for the upcoming school year?
- 9 How will you leverage access to texts to support interdisciplinary growth?
- 10 What role will current events play in your support of student participation and student growth?
- 11 How will you measure the success of your program?

BOOKCONNECT

Ensure that Every Student Has Access to High-Quality Books at Home

My Books Summer helps build home libraries and allows students to continue their reading and writing engagement all summer. Our book packs reflect the diversity, interests, and reading levels of each student, and include reading and writing activities that keep students on track for success over the summer and well into the new school year.

Families have played an increasingly important role in their children's learning throughout the pandemic. Schools can support discussions about the My Books Summer texts with **BookConnect**, an app that provides conversation prompts to help families with children in Grades PreK–4 make deep connections through reading and exploring books together.
