# Sizing Up Sharks

The bar graph below shows the biggest sharks in the world. Some of the information is missing. Use the chart to add the labels and data that are missing. Then, answer the questions that follow.

Type of Shark	Number of Pounds
whale shark	50,000 lbs
basking shark	32,000 lbs
great white shark	7,000 lbs
Greenland shark	2,250 lbs
tiger shark	2,070 lbs

- How many more pounds is the whale shark than the basking shark? \_\_\_\_\_
- Which shark weighs more than the Greenland shark but less than the basking shark?  
\_\_\_\_\_
- About how many pounds do the Greenland shark and the tiger shark weigh together (to the nearest thousand)? \_\_\_\_\_

**BONUS:** Create your own question for this bar graph. \_\_\_\_\_
