

Name: _____

U.S. Wildfires

You've just read that learning about fire safety can help prevent fires in homes and in the wild. Most wildfires happen in the summer and fall. Alaska has had the most acres burned by wildfires this year, as of early September—nearly 3 million acres. This bar graph shows the next six states with the most acres burned by wildfires, as of early September. Use the graph to answer the questions.

**Top-6 States With the Most Acres Burned
by Wildfires (after Alaska)**
