

ACTIVITY #1

Name: _____

For use with pages 6–7 in the December 13, 2010, issue of Scholastic *MATH* Magazine.

Burger Bars

Use the chart below to make a bar graph of the grams of fat in different fast-food restaurants' quarter-pound cheeseburgers:

- ✓ Write the names of the restaurants in the blank spaces under the horizontal (left-to-right) axis. You may have to abbreviate the names.
- ✓ Above each restaurant name, draw a bar. The height of the bar is the number of grams of fat in that restaurant's quarter-pound burger.
- ✓ If possible, use a different color to fill in each bar.

| burger | grams of fat |
|--|--------------|
| Wendy's Classic Single With Cheese | 19 |
| McDonald's Quarter Pounder with Cheese | 36 |
| Burger King Whopper with Cheese | 43 |
| Burger King Double Cheeseburger | 26 |
| Hardee's Little Thickburger | 39 |
| Jack in the Box Jumbo Jack | 38 |
| Dairy Queen $\frac{1}{4}$ -pound Grillburger with Cheese | 28 |
