# Charting Olympic Medals

**Directions:** Michael Phelps won eight Olympic gold medals in the 2008 Summer Olympic Games, but he wasn't the only athlete to win a medal. This chart shows the medal count of the top five winning countries. Use the chart to answer the questions below.

| Country       | Gold Medals | Silver Medals | Bronze Medals | Total |
|---------------|-------------|---------------|---------------|-------|
| USA           | 36          | 38            | 36            | 110   |
| China         | 51          | 21            | 28            | 100   |
| Russia        | 23          | 21            | 28            | 72    |
| Great Britain | 19          | 13            | 15            | 47    |
| Australia     | 14          | 15            | 17            | 46    |

1. Which country won the most gold medals? \_\_\_\_\_
2. How many more Olympic medals did the U.S. win than Russia? \_\_\_\_\_
3. Which countries won 21 silver medals? \_\_\_\_\_
