

Size By Your Eyes

We saw a HOUSE.
We saw a MOUSE.
We saw them with our eyes.
Can you figure
Which is bigger?
Or are they the same size?

We saw a RAKE.
We saw a SNAKE.
We saw them with our eyes.
Here's an order:
Which one's shorter?
Or are they the same size?

We saw a PAN.
We saw a FAN.
We saw them with our eyes.
Won't you holler —
Which one's smaller?
Or are they the same size?

We saw a NICKEL.
We saw a PICKLE.
We saw them with our eyes.
Here's a riddle:
Which one's little?
Or are they the same size?

Ruth and I use our eyes
To look around
At things in town
And compare their size.

Max's Challenge:

Read the poem again. Each time Max asks about size, decide: Is one of the things smaller and one of the things larger? Or are they about the same size? Use the Activity Page to help you compare. *Circle your answers.*

A house is:

A house is bigger than a mouse.

A house is smaller than a mouse.

A house is about the same size as a mouse.

A pan is:

A pan is smaller than a fan.

A pan is bigger than a fan.

A pan is about the same size.

A rake is:

A rake is shorter than a snake.

A rake is taller than a snake.

A rake is about the same size.

A nickel is:

A nickel is smaller than a pickle.

A nickel is bigger than a pickle.

A nickel is about the same size.

Max's Math Adventures

Take some time to solve the rhyme

Name: _____

Date: _____

Size By Your Eyes

For each pair, circle the item that is larger. If they are about the same size, draw an equal sign (=) between them.

House

Mouse

Pan

fan

Rake

Snake

nickel

pickle
