

- 58.** 24 people showed up for Magical Melissa's Amazing Magic Show, where she would pull a dishwasher out of a hat. There were 4 equal rows of chairs, and everyone got a seat. How many chairs were in each row?

$$24 \div 4 = \underline{\hspace{2cm}}$$

There were          chairs in each row.

- 59.** Industrious Ignatz made \$21 cutting lawns for elves. Using scissors, he cut 3 lawns, each for the same amount of money. How much did he get paid to cut a lawn?

$$21 \div 3 = \underline{\hspace{2cm}}$$

He got paid \$         to cut a lawn.
